

TEAM 6

PROJECT INCEPTION

REBECCA NASHED, DAVID RADEMACHER, AND SAMUEL TERWILLIGER

PROJECT VISION

Our goal is to develop an intelligent web-based chatbot capable of helping users utilize UTA's online resources to their utmost potential.

CUSTOMERS AND USERS

- University Systems with Online Users
- Students and Faculty of University Systems

Our project will be tailored to UTA, but if we market this product, it could be generalized to other universities.

FEATURES

- 24/7 Availability
- Low User Hardware Requirements
- Low Maintenance Cost
- Easy Access
- Intuitive Assistance

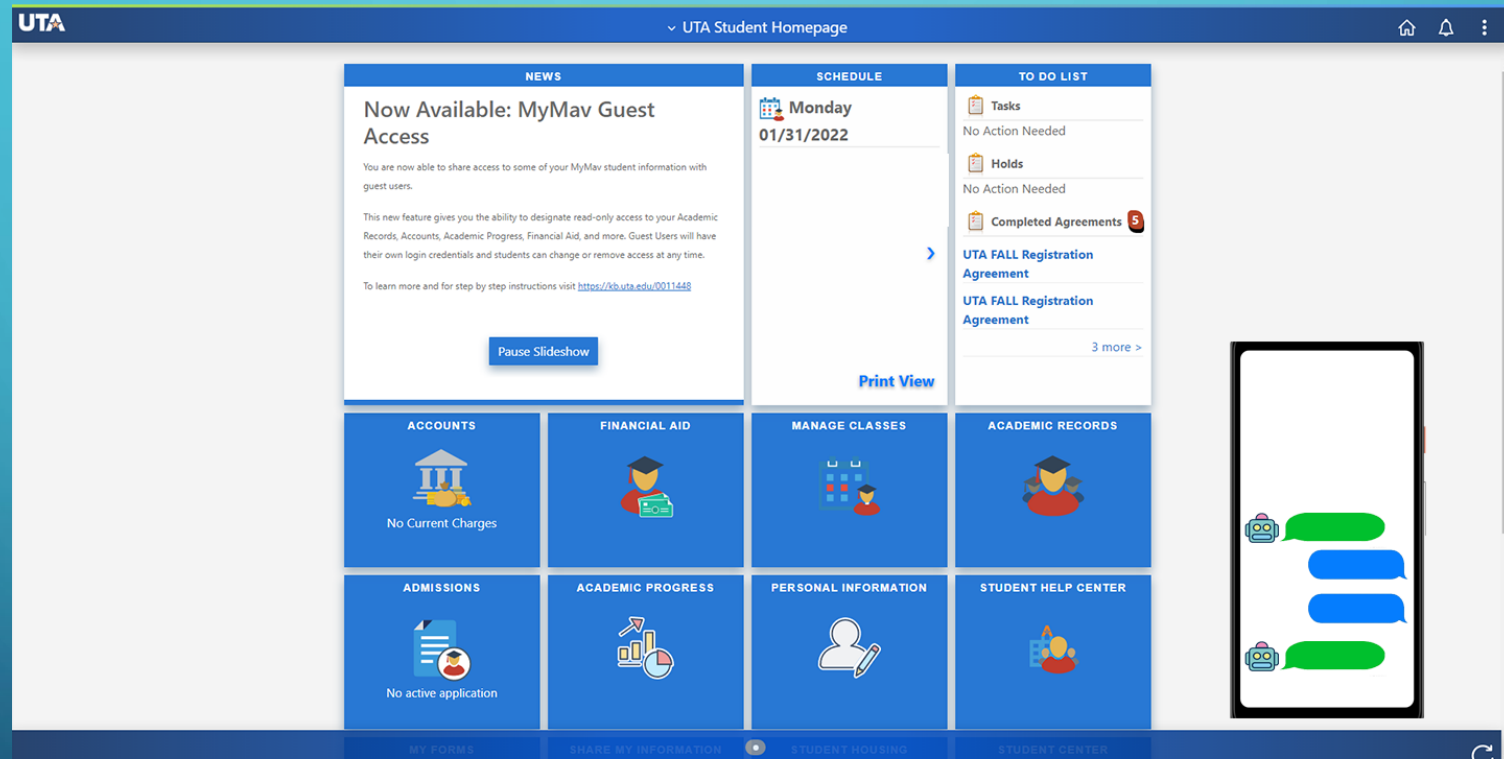

TOP 3 RISKS

1. Host Server Stability
2. Host Website Integration
3. Lack of Experience

COMPETITORS

- UTA's Blaze Bot
- UTA Help Chat
- Help Desk Phone Lines

SCREEN SHOT

* designs subject to change

SOFTWARE DEVELOPMENT PLAN

- **Project Inception – 1/31**
 - Initial presentation and plan
- **Iteration 1 – 2/14**
 - Mockup/Project skeleton
- **Iteration 2 – 3/7**
 - Flesh out project, add functionality, solidify path forward
- **Iteration 3 – 4/4**
 - Main functionality complete, work on final touches
- **Final Deliverables – 4/25**
 - Completed project and final presentation
